AT&T Statement on the Cyber Intelligence Sharing and Protection Act of 2011

The following may be attributed to Tim McKone, AT&T Executive Vice President —Federal Relations:

“AT&T supports the “Cyber Intelligence Sharing and Protection Act of 2011” as an important and positive step in strengthening cybersecurity collaboration. The sharing of cyber threat and attack information is an essential component of an effective cyber-defense strategy, and the legislation helps to provide greater clarity for private sector entities. We commend the bill’s sponsors for their leadership on this critical issue. As the legislation progresses, we look forward to continuing to work with Chairman Rogers, the committee and other stakeholders on this important endeavor.”
